WELCOME
SCHC offers follow-up counselling for victims and survivors of sexual assault and domestic violence at our care centre. Our social workers provide trauma-focused therapy to support clients on their journey to recovery. We empower clients to recognize their own self-worth and begin the process of healing in a prompt, professional, and compassionate manner.

Sexual assault and domestic violence are life-changing traumas. Abuse can take many forms including physical, sexual, emotional, verbal, and/or financial. Anyone – men, women, or children, regardless of age, religion, culture, ethnicity, financial situation, sexual orientation, marital or immigration status – can experience abuse. Abuse can take place at home, at work, at school, or from someone in authority such as teacher or a coach.

SADVCC Services
1) SADVCC provides non-acute short term trauma focused therapy to individuals 12 years and older who have experienced sexual assault or domestic (intimate partner) violence or abuse, including historical abuse.
2) Priority will be given to individuals referred from the emergency department or have been assaulted within the last 7 days.
